

Jochem Alsenz is an Expert Scientist in the field of preformulation R&D at F. Hoffmann-La Roche Ltd. He obtained his PhD at the Institute for Medical Microbiology, Johannes Gutenberg University of Mainz (Germany) in 1985 and joined the drug delivery systems group at Roche in 1990. Over the past 28 years, he specialized in pharmaceutical profiling and formulation of new chemical entities for oral delivery and developed new assays and strategies for physicochemical property determination in a variety of areas such as permeability, solubility, dissolution or compatibility. Recently, he also gained some expertise in the area of long-acting drug delivery systems for ophthalmic drug delivery. He is author/co-author of more than 60 publications in scientific journals and book chapters.
